

Parks & Peaks iPhone app

What's New in version 3

1. New Awards

BOTA	Beaches on the Air (disabled)	SIOTA	Silos on the Air
HEMA	Smaller hills	ZLOTA	ZL on the Air
POTA	Parks on the Air		

2. Spots List screen

- Displays linked awards & site IDs, eg for SOTA in a park and a pota site, you would see (WWFF) VKFF-1234 / (POTA) VK-4321
- Search button added for finding Spots with specific awards

3. Add New Spot screen

- Mode now has quick buttons for the popular Modes, instead of picking from a list

4. Log/Re-Spot screen

- Shows linked Awards & site IDs
- Mode now has quick buttons for the popular Modes, instead of picking from a list

5. Alerts

- Mode now has quick buttons for the popular Modes, instead of picking from a list

6. Log Analysis

- Shows all awards
- All awards are exported
- Can un-export multiple dates
- View logs has tabs for each award where less used awards are stored in OTHER.
- Can select one or all in each tab and email
- Swipe right on file name to view contents

7. QSO Logging

- Can search by log type
- Automatically logs linked awards such as SOTA, WWFF, POTA depending on settings
- Shows linked awards & site IDs

8. Download sites

- Site Awards are shown as switches, you can press a switch for individual sites by award or all sites.
- Detects when new sites are available and indicates New next to the switch

9. Callsigns and Names

- Now when you download, you will also upload any changes you have made to an aka field

10. Search Sites Screen

- Can add more information for a new site

11. Nearest Sites

- Press & hold anywhere on the map to find sites nearby
- Can view a list of selected sites
- Can create a report and export it to csv for planning of activations
- View sites on map by awards button
- Info on map pins has been expanded. Also indicates whether you have activated the site before.
